

# MEET OUR LOCAL PARTNER VALLÉA FARM & CO.

Founded in 2021, Valléa Farm & Co. was built on a simple idea: to grow exceptional produce year-round, close to the people who eat it. What began in a 3,000-square-foot warehouse in Oshawa became a proving ground for refining growing methods with a strong focus on flavour, freshness, and consistency. Their vertical farm spans 7,500 square feet where they grow herbicide/pesticide free crops in an indoor controlled environment. The business currently employs four people, with plans to expand the team in the coming year.

*"This partnership continually pushes us to expand our boundaries and grow a broader range of products that are not typically available year-round or grown locally!"*

— Valléa Farm & Co. Team
